## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 103***

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. **Claims 1-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hu (U.S. patent No. 5,938,769).**

Claim 1: Hu discloses a CPU upgrading adapter comprising a socket frame having a plurality of conductive holes 50 (Fig. 2) for receiving an upgrading CPU 80 (Fig. 2); a circuit board 10 (Fig. 2); and a switch 70 (Fig. 2) (col. 2, lines 60-64; and col. 3, lines 18-28). Hu does not explicitly disclose connecting the circuit board to a motherboard of a XBOX game machine. However, Hu discloses inserting the circuit board into a computer (col. 2, line 51). Further, connecting a circuit board to a motherboard in a computer would have been well known to a person of ordinary skill in the art at the time the invention was made. It would have been obvious to a person of ordinary skill in the art at the time the invention was made to connect the circuit board taught by Hu to the motherboard of a XBOX game machine, since connecting a known circuit board to a motherboard of a specific computer game machine so as to

allow a high frequency CPU to be applied to the game machine requires only routine skill in the art.

Claim 2: Hu discloses a power connector 20 (Fig. 2) as claimed.

Claim 3: using a turbo switch connector to connect a switch to the circuit board would have been both well-known and obvious design choice according to a designer's preference.

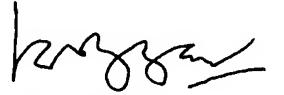

Claim 5: Hu discloses that the upgrading adaptor is capable of receiving an Pentium CPU (col. 3, line 54; col. 4, lines 1-2; and col. 1, lines 34-40)

Claims 4 and 6: refer to discussion in claims 3 and 5 above.

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kim Nguyen whose telephone number is 571-272-4441. The examiner can normally be reached on Monday-Thursday during business hours.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Xuan Thai, can be reached on 571-272-7147. The central official fax number for the organization where this application or proceeding is assigned is 571-273-8300.
